from Gary & Janice

This is in response to the question of the future of the Mesa County Fairgrounds. We are homeowners near the property in question. Studies show that humans need open space to have a good quality of life in urban areas, which this county is moving toward. Other parts of the county have preserved park land, such as Canyon View Park. The current Fairgrounds, if maintained and developed into an even better park land, could help serve open space needs of a growing population. If the Mesa County Fairgrounds is divided and built on, the potential the land holds will be lost. Thank you,
