From Linda

There has been a lot of discussion about a new bldg. close to the Riverside area. I don't object to the bldg. but there was talked about the monster trucks and their events being held in the bldg. Please reconsider any type of this activity as many of us have enough problems outside and you bring this inside it will make it to where we can't attend any events involving gas power vehicles. I for one have lung problems as I can't even handle cigarette smoke. Somebody on oxygen won't be able to handle it either inside. This kind of event needs to stay at the fairgrounds as we will be able to breathe easier there rather than in a building. Please think about this in your planning as smoke, fumes, etc. including dust could be unbearable for those with lung and allergy problems.
