To: Whom it May Concern

(IFB-19-03130-Hwy 6)
State Highway 6 & North River Road Improvement Project
Bidding Questions

Item 626-01100 Public Information Services - Due to the relatively short duration and minimal traffic impact of the project, project manager does not anticipate the need for flyers, although a press release prior to the project is required by coordinating with CDOT PIO Tracy Trulove. The traffic control subcontractor will be required to place Variable Message Signs one week in advance of beginning of construction. Public Information Services will require ongoing communication defined as answering, or assisting in answering, questions and complaints as they arise.
