Addendum 1
Drainage Feasibility Study for Reed Mesa and Melody Estates
RFQ 19-03056

This addendum to the Request for Qualifications (RFQ) for the above referenced project supersedes all contrary and conflicting information which is hereby supplemented or revised in certain particulars as follows:

Question:

Do you happen to know if there are any existing plans of the areas and/or drainage studies that have been developed for the two areas? If so, would these documents be able to be made available in an addendum to those interested in bidding on this RFQ? We are planning to visit the site on Tuesday, and having this information would be helpful developing the project approach if it exists.

Answer:

Plats are available for both Melody Estates and Reed Mesa, that information is available on the Mesa County website under surveys and plats. Technical documents such as drainage studies have not been developed and it will be the responsibility of the consultant that is chosen for this project to develop drainage reports.

This addendum must be acknowledged and included with your RFQ submittal.

All remaining requirements of the RFQ remain unchanged.
