Reactivity: It is normally unstable and readily undergoes violent change without detonating, it reacts violently with water, it generates toxic gases, vapors and/or fumes.

Corrosive: It is aqueous and has a pH of less than or equal to 2 or greater than or equal to 12.5.

Ignitability: It has a flash point of less than 140 degrees F.

Additional testing at the discretion of the County: Specific EPA: F, K, P, and U listed wastes
